

England

Between 07-12 May 2023,7 students and 2 teachers from İstanbul Erkek Lisesi participated in a short-term exchange program in the project called "Die Ziele für nachhaltige Entwicklung entdenken", hosted by Lycee Francais Charles de Gaulle 'High School in London -England. This project is carried out with the participation of 4 countries; Germany, Italy, Turkey and England.

During this program Water Aid organization gave a lecture to students on water resources and the importance of their cleanliness. The Thames Barriers was visited for a conference on how to prevent floods to protect the city, London. The work named Climate Fresk was applied to improve the students' working skills. As a result, students' contribution with their presentations raised environmental awareness.

The most impressive places of London, Oxford and Greenwich were visited during the city exploration: Royal Observatory, Cutty Sark, The Natural History Museum, etc.

During this project the students made unforgettable memories about London, England and they created international friendships.
